CFB 27 · MADDEN 27 · ONE APP

Saturday TO SUNDAY

One app that carries your whole universe: your college dynasty and your NFL franchise, side by side, written up every week like a real sports page. On your phone.

BOTH GAMES | ONE UNIVERSE | FREE

BUILT ON ZIP'S VINTAGE ESPN APP

WHY I BUILT THIS

THE APP I NEEDED

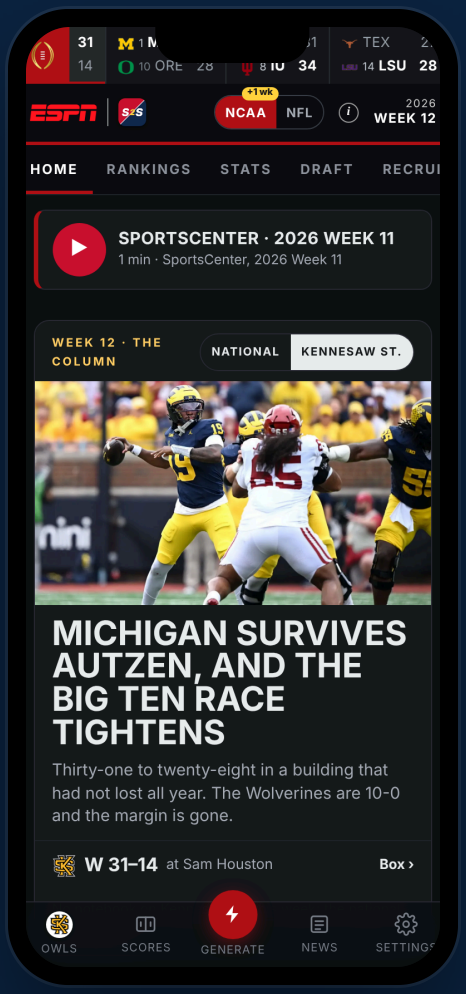

I’m 38 with three kids. I don’t have time to sim a season and then scroll through menus to find out what happened.

> *If I could play both games and run the whole universe from one app, I would. I do it all the time.*

I play at night, in my co-op league or on my own. What I wanted the next morning was a paper: the front page, the scores, the column, the recruit who flipped, the rookie who just went in the first round. Written about my league, because it is my league.

When I saw what Zip built, I knew it was the foundation. He had already done the hard part, the part nobody else had done. I had to go above and beyond with it: add the Madden side, link the two games, and make the whole thing read like it was real.

JJ Founder, U-LUV Foods · Gamer, U-LUV Gaming · Built on what Zip started

The cover, flipped to your team: your game, your record, your beat writer.

2 games
CFB 27 AND MADDEN 27

1 universe
YOUR RECRUITS BECOME YOUR ROOKIES

Every week
A NEW ISSUE THE MORNING AFTER

WHAT IT DOES

TWO LEAGUES. ONE TRUTH.

Think about it. Who won the Super Bowl? Who won last year's national title? You can be a fan of one league and never know the other exists. They run on their own. But the best players from one end up in the other, and that is where they meet.

SATURDAY

Your CFB 27 dynasty: the poll, the playoff picture, recruiting, the portal, the carousel, your program's money. Its own record book, its own history.

THE DRAFT

where Saturday becomes Sunday

SUNDAY

Your Madden 27 franchise: the standings, the power rankings, The Wire, the cap, the awards. Its own record book, its own history.

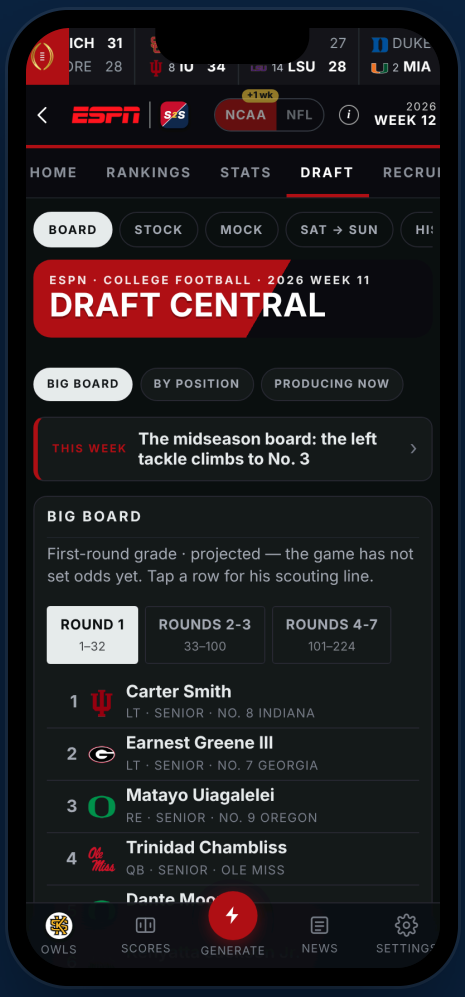

EVERY WEEK, A FRONT PAGE

A hero story, the slate, the top five, your team, and the week's pieces. National, or flipped to your team with one switch. Each week is kept, so the season reads back like a paper's archive.

EVERY PAGE A REAL SITE HAS

Scores and box scores. Rankings and the playoff picture. Stats and the awards. The draft board, the stock report, the mock. Recruiting and the pipelines. The coaches. The Wire. The Business desk. Player cards and team pages. Game photos where the library has them.

BOTH LEAGUES, LOGGED Seasons, titles, classes and Halls of Fame kept for each league on its own, and the crossover kept between them: who you recruited, who you drafted, who you inducted.

Draft Central: the board, the stock, the mock, Sat → Sun, the history. The same room in both leagues.

HOW IT WORKS

ALL FREE. RUNS ON YOUR PC.

S2S is a small app that runs next to your saves. It reads them, never writes them, and it writes the paper with a free ChatGPT account. Your phone just reads.

1
Connect ChatGPT
One button. The free plan is enough: a season uses about a fifth of a month's allowance.

2
Add your saves
CFB 27, Madden 27, or both. Read only. Your save is never touched.

3
Link the leagues
One universe: your college players follow you to Sunday.

4
Sim, then Generate
Advance a week in the game. S2S reads what happened and writes the issue.

5
Read it anywhere
An icon on your phone's home screen. At home on Wi-Fi, or anywhere with Tailscale.

WHAT IT NEVER DOES

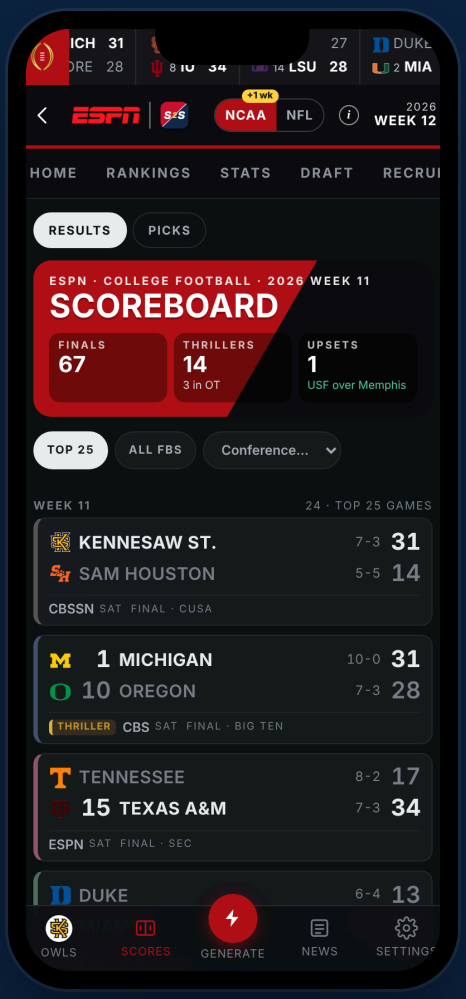

- Never writes your save on its own. It only reads it.
- Never spoils a score the game is still hiding.
- Never costs anything. No account but the ChatGPT one you already have.

YOUR LEAGUES ARE YOURS

They live in your user folder, apart from the app, so updates never touch them. Updates install themselves, or a red dot on the Settings gear says one is ready.

ADD-ONS IT READS ON ITS OWN

MyDynasty, MyFranchise and Zip's Economy Overhaul, when they are installed. Nothing to set up.

Every game, every week, the box score a tap away.

SATURDAY TO SUNDAY

ONE UNIVERSE

Link a college dynasty and an NFL franchise and S2S treats them as one world.

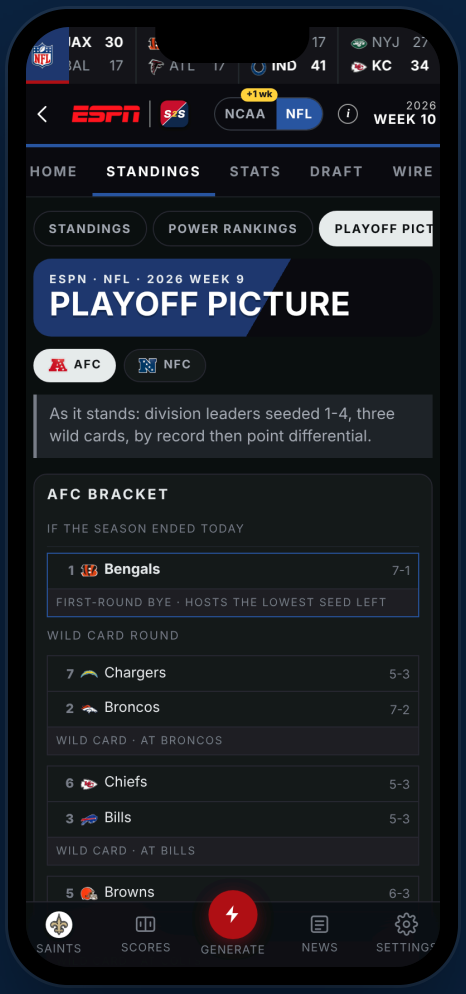

The four-star you flipped on a homecoming weekend shows up on the draft board three years later. The class you signed becomes the rookies you scout. Your former players are tracked around the league, your alumni get their own page, and the Hall of Fame remembers all of it.

THE DRAFT IS ONE ROOM

The college board, the stock report, the mock and the history, the same tab in both leagues. Before the NFL draft happens, the board holds the class the game is still deciding on.

YOUR SEASONS, ALL-TIME

The Universe tab keeps every season, both leagues, your titles and your classes, and a Yearbook a year.

The playoff picture, seeds and all, read from the save.

Recruit
ON SATURDAY

Draft
ON SUNDAY

Induct
YEARS LATER

WHERE IT'S GOING

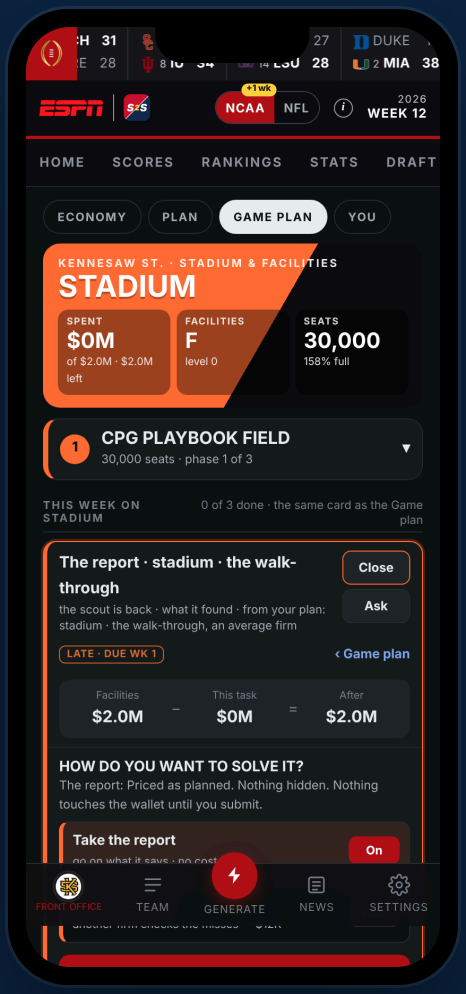

RUN THE WHOLE THING

Next up: Front Office. You are the athletic director, or the owner. The paper covers every call you make.

The budget and where it goes. The boosters, who they are and what they want. Game day: the prices, the crowd, the gate. The stadium, phase by phase. The people you hire. A board that grades your year.

And what you build goes back into the game. Raise a stadium phase in S2S and the build order goes to your mod tools; the new seats are in the game on Saturday. Earn a facilities level or a grade, and one tap writes it into your save, with a backup, game closed, read back and checked.

NEXT	**AD and Owner mode.** The budget, the boosters, the stadium and the calls, with the paper covering every one.
IDEA	**Head Coach mode.** Your staff, your game plans and your job security, week to week.
IDEA	**Co-op.** One universe shared by a whole league of friends: every school and every club, one paper.
IDEA	**Compare.** Your universe against other people's: titles, classes, Halls of Fame.
IDEA	**Discord tie-in.** The issue posted to your server each week, and the comments with real people in them.

Front Office ▸ Stadium, in the owner's build today: the fill, the phases, the three legs of the next one.

ON YOUR PHONE

RUNS ON THE PC. LIVES ON THE PHONE.

The writing happens on your PC, next to your saves. Your phone just reads it, as an icon on the home screen that opens full screen like any app.

ONLY AT HOME · 2 MINUTES

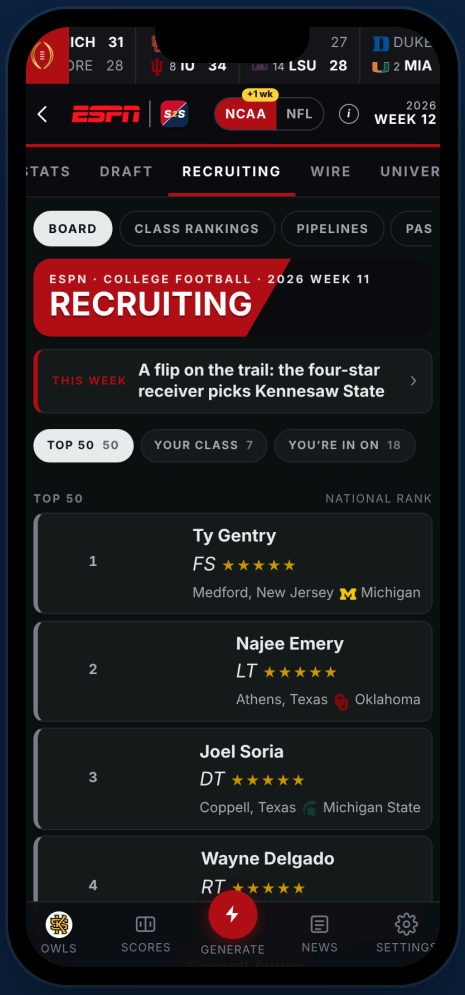

Same Wi-Fi as the PC. Settings ▸ On your phone shows a code; point the camera at it, tap the link, Add to Home Screen. Done.

ANYWHERE · 5 MINUTES

Install the free Tailscale app on the PC and the phone with the same account, and S2S shows an Anywhere link: home Wi-Fi, other Wi-Fi, cellular, your other computers. Nothing goes on the internet; only your own devices can see it.

LEAVE THE WINDOW OPEN

Double-click S2S on the PC and leave its window open while you read. Start with Windows keeps it running after a restart, so the paper is waiting when you wake up.

Sim at night. Read it over coffee.

GET IT · FREE FOR YOUR OWN LEAGUE

THREE STEPS TO A PAPER

1 **Download**

The green Code button ▸ Download ZIP, then right-click ▸ Extract All somewhere you'll keep it, like C:\S2S.

2 **Double-click S2S.bat**

If Windows says "protected your PC", More info ▸ Run anyway. It offers to install Node.js if you don't have it; then double-click again.

3 **Follow the screen**

Connect ChatGPT · Add your save · Your team · On your phone · Automatic weeks. Sim a week and the paper is waiting.
