S2S · SATURDAY TO SUNDAY

QUICK START

A Windows PC with your CFB 27 and/or Madden 27 saves, a free ChatGPT account, and a phone on the same Wi-Fi. Ten minutes, start to paper.

`github.com/TARTfromULUV/saturday-to-sunday`

1 Download

On the GitHub page, the green **Code** button ▸ **Download ZIP**. Right-click the zip ▸ Extract All, somewhere you'll keep it, like C:\S2S or Documents.

2 Double-click S2S.bat

If Windows says "Windows protected your PC", click More info ▸ Run anyway. If Node.js isn't installed, S2S offers to install it; say yes, then double-click S2S.bat again. The first start takes about a minute and your browser opens on the setup screen.

3 Follow the screen

Five steps, one screen: **Connect ChatGPT** (one button, free) · **Add your save** · **Your team** · **On your phone** (scan the code) · **Automatic weeks**. Then sim a week in the game and tap Generate. The first Generate files the week; from your next advance on, every Generate writes the issue.

LEAVE THE WINDOW OPEN

S2S runs while its window is open. Close it and the phone can't read the paper. Settings ▸ This device ▸ Start with Windows keeps it running after a restart.

YOUR PHONE

Same Wi-Fi: Settings ▸ On your phone shows a code; scan it, tap the link, Add to Home Screen. Anywhere: install Tailscale on both, and the Anywhere link appears.

WHAT IT NEVER DOES

Never writes your save on its own; it only reads it. Never spoils a score the game is still hiding. Never costs anything.

STUCK?

Settings ▸ Help answers the usual questions. Updates: Settings ▸ This device ▸ Update the app automatically, or the red dot on the Settings gear.
